EXPERIENCE

06/2018 - 11/2023

Rosario

DevOps & SRE

Clear

- In charge of infrastructure using different AWS technologies like ElasticBeanstalk, CloudFront, Route53, S3, EKS, ECR, EC2, SNS, SES, API Gw, RDS, IAM, WAF, S3, Lambda
- Organize, prioritize and execute a Kubernetes migration from on-premises servers.
- IaC with Terraform and Typescript + AWS SDK
- Application's security using tools like CrowdStrike, AWS WAF and HAProxy configurations
- Monitoring with Prometheus + Grafana, FluentBit + Cloudfront, New Relic

03/2017 - 07/2019

Rosario

NodeJS developer

Whyline

- Developer in the subscription models with microservices using technologies like NodeJS, AngularJS, MongoDB and AWS

02/2014 - 12/2016

Rosario

Developer

SoftING

- Configuration and maintenance of base code, databases and few devops task as well

LANGUAGES

Spanish
Native

English
Proficient

SKILLS

Atlas	AWS	CircleCI	CloudFront	Cloudwatch	DevOps	Docker	EC2	IaC	IAM	IoT
Javascript	Kubernetes	Lambda	Linux	MongoDB	NodeJS	Raspberry	Raspberry PI	RDS		
S3	Terraform	VPC								

STRENGTHS

Adaptability with new technologies

As a developer, I took charge of infrastructure and security of the company, learning many new technologies, always with passion with what I do.

Teaching skills

As an SRE, I organized several workshops with colleagues, teaching them how infrastructure and different services interact together to make things work. I'm always willing to help anyone that needs a hand.

EDUCATION

2010 - 2014

Systems engineering

Universidad Abierta Interamericana
